

## Installing the Engage Client on your Smart Phone (Android OS)

### Overview

The Engage application is a web-based application. Unlike some apps on your phone, it can be installed without using the Apple App Store or Google Play Store. It's as simple as visiting a website and using your browser's built-in functionality.

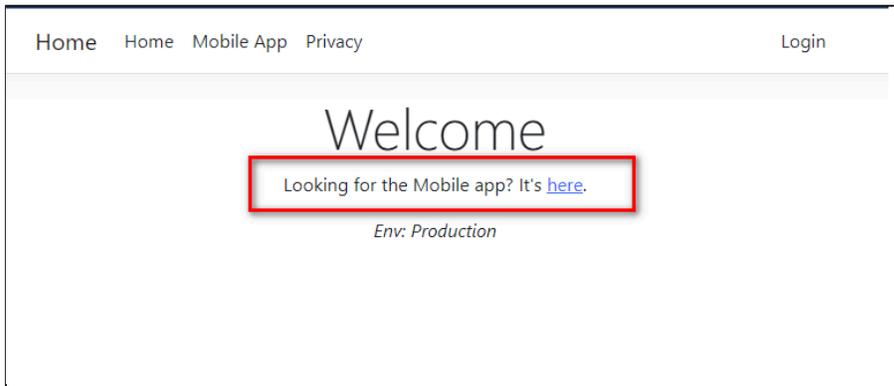

Below are instructions for our support mobile platforms, Google's Android and Apple's iOS.

### Instructions for Google's Android OS

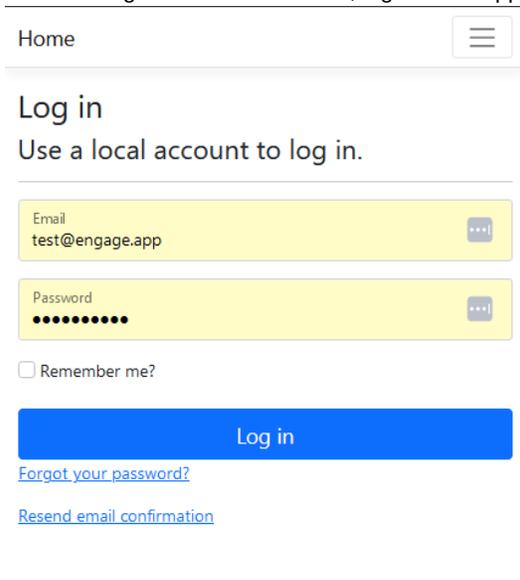

1. Visit <https://poe.nutmegit.com/Engage/> from your mobile device's web browser, Google Chrome.

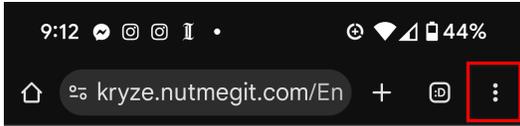

2. Click the "It's here" link or "Mobile App" from the top menu bar.

3. Once the login screen has loaded, login to the app.

4. Install the website as an "App" on your phone by choosing the "Add to Home Screen" from the share icon in Chrome.
